

# Opensource Database Design

Mr. Henri Haapakanni  
Software Architect behind  
the Opensource dbdesign™

Whitepaper  
22th February 2017

## Summary

Document describes *Opensource dbdesign*<sup>®™</sup>, ODBD is a result of knowledge in the field of software engineering gathered by the founder of *Private Limited Investment Company Henri Haapakanni & Sons* (March 2017). Company is located in Tampere, Finland.

*Opensource dbdesign*<sup>®™</sup> is the trademark of a global open source database designing portal coordinated by the company. Company cooperates together with Opensource alliances, worldwide education systems and corporate life to increase productivity in the field of software engineering by providing licensed open source database models for free of charge.

Opensource database designs provided by the company are reducing the excessive amount of work spent on database modelling. Redundancy of database designs globally will decrease significantly and the software systems will globally evolve interconnected.

*Inspired by the phrase “Re-inventing the wheel” and poor productivity of software engineering – Henri Haapakanni.*
